# Solution Experience Snapshot (partial list)

CS Solutions developed an ETI driven SOA for the Standard Procurement System (SPS) that is used by over 23,000 procurement officers (as of June 2005) for buying everything from office supplies to battleships CS Solutions and ETI is working in partnership on this initiative

CS Solutions provided project lead and conversion development resources for a large Prescription Drug Claim Data Mart for the BC Provincial Ministry of Health. Project included technical design, process implementation and testing, and production implementation. Designed and developed an algorithm to time-slice type-two dimensions, thus providing true date range representation of the de-normalized dimension.

CS Solutions helped in the datawarehouse initiative to assist in developing the infrastructure and methodology to use in utilizing ETI, DB2/UDB and Cognos technologies among others

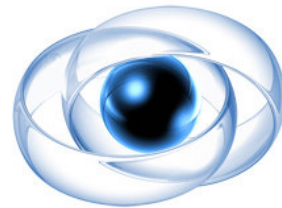

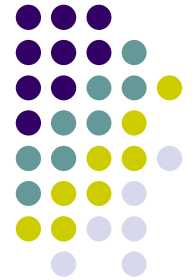

CS Solutions worked with Informatica on the Medicare/Medicaid Management System for State of West Virginia writing the specifications and mappings in PowerDesigner and moving Repositories and Metadata between Servers

Worked on the Integrated Defense Systems providing complete documentations services for the Boeing and the Department of Defense for the upgraded F-15 Fighter

Continuing to provide desktop engineering support of Windows XP SP1 and SP2 administration, diagnosis and resolution of hardware. CS Solutions also supports the nationwide installed Lotus Notes user base for the Department of Housing and Urban Development (HUD). This includes but not limited to activities include daily operational tasks such as user administration, problem response, and system-monitoring.
